Hello Mr. Mansfield,

I have received your email and request and, by way of cc, have forwarded your request to our Public Works Director (Jeff Goble) and our Community Development Department Director, Don Reimer ... they will proceed with processing this for you

~Nancy

Subject: Water Tap

February 27, 2020

Dear Nancy Kerry,
Frisco town Manager

I am asking the city of Frisco town counsel for permission to allow a water tap to my property on Lot 153 of Bills ranch. I do have a sewer line to the property that was installed in 1990's along with three other properties on the Goldfinch Lane road. A right of way has been in place since 1982 when the property was purchased.

The water tap and line will allow me to use my cabin in greater comfort. My family and I have enjoyed Frisco for many years – from the pancake breakfasts on the 4th of July and the parade since the time it was a '2-block' event to an annual Hockey Fest after Thanksgiving on the ranch ponds. Since the time Frisco didn't have curbs or a Walmart, we've enjoyed scaling Peak One to view the valley below, riding multiple bike paths throughout the city and attending so many festival weekends. In addition, I run the MADD Victim Impact Panels for Summit County at the Senior Center six times a year. These panels usual end around 9:00pm and I would prefer to stay at my property, particularly during inclement weather. As we have aged over the years, the lack of water severely limits this possibility. City water would allow incorporation of a bathroom and shower in our cabin and greater use of our property for extended vacations.

Your approval of this water tap will allow my wife and I to further expand the use of our cabin during our retirement years and our enjoyment of the town of Frisco and all that it has to offer.
